T. 32 N. 4. 1 W. 3rd Mer. Ind.

General Description

The soil in the timbered land is poor & sandy; the S. end of a yellow color & the timber is W & Bl. Oak generally.

In the dry Sweet prairies the soil is of a black sandy loam, the grass thereon coarse Red top. The marsh prairies have a poor soil, thin brown loam and thin bottom & floating in many places, the grass thereon a fine Red top & very frequently flag weed. The water on the prairies in this township is produced from the out let of a lake on the E. boundary which immediately after leaving the lake spreads over the prairies & in most places there is no current perceptible, although the water forms a creek about the center of the township & thence bears off in a southerly direction & falls into the Tippecanoe River.

I hereby certify that in pursuance of a contract with M. T. Williams Surveyor General of the U. States for the States of Ohio & Indiana & the Terr. of Michigan dated 24th February 1834 & in strict conformity to the laws of the U. States & the instructions of said Sur. Genl. I have surveyed & subdivided into sections — Township 32 North Range 1 W. 3rd Mer. Indiana; & I do further certify that the foregoing are the true & original field notes of said survey & subdivision.
